

Session: Insuring Extreme Risks

Nicolas Baradel

CREST-ENSAE and Université Paris-Dauphine

- ▶ *Does Frugality Influence Firm Behavior? Evidence from Natural Disasters*, **Matthew WYNTER**, University of Chicago.
- ▶ *The Influence of Sponsor Characteristics and (non-)Events on the Risk Premia of CAT Bonds*, **Tobias GÖTZE, and Marc GÜRTLER**, Braunschweig Institute of Technology.

Discussant

Does Frugality Influence Firm Behavior? Evidence from Natural Disasters

- ▶ Using an Econometric based approach, the author show that firms in more frugal countries issue more new-debt and tend to have a shorter corporate maturity, in case of a disaster.
- ▶ An interesting result showing that, this inner characteristic of the country influence the firm behavior in the case of a disaster.

Discussant

The Influence of Sponsor Characteristics and (non-)Events on the Risk Premia of CAT Bonds

- ▶ Using an Econometric based approach, the authors show that the sponsor characteristic as well as catastrophic and economic events influence the CAT bond premia.
- ▶ An interesting result showing that, characteristics that should be independent of the *payoff* of the contract, has an impact which may come from the imperfect information.

Discussant

Does Frugality Influence Firm Behavior? Evidence from Natural Disasters

- ▶ What can be the explanation behind this result?

Discussant

The Influence of Sponsor Characteristics and (non-)Events on the Risk Premia of CAT Bonds

- ▶ Removing 20% of the data with missing or incoherent values could have an effect (bias point of view) on the results ?
- ▶ Is there a particular reason to not introduce a parameter b_t in the regression which could handle a global time change appetite of consideration of the market (independently of the others) ?
